

About our music...

Customers often ask me, “What radio station are you playing?” This usually happens when they walk in and hear one of their favorite tunes from back in the day. Well, the truth is, it’s not a radio station at all. Our ambient music is provided by the Muzak Corporation. Years ago, Muzak became famous for providing music for hotel lobbies, doctor’s waiting rooms, and inside elevators. That’s right, they were the original provider of what was called “sleepy elevator music.” Muzak has since come of age and now provides all types of foreground and background music for all kinds of commercial applications. At Café Americana, you are hearing their all 70’s channel. That’s right, it’s all 70’s all the time. Why? Because for my money, the best music ever produced was recorded during that decade. I’m still a firm believer that the greatest rock tune ever recorded was “Stairway to Heaven” by Led Zeppelin. If you visit this website and you disagree, please stop in and tell me where I’m wrong.
